

newearth project - Sierra Leone

leading the African continent into a sustainable & sovereign renaissance

what is the NewEarth project?

a worldwide movement of creative and dynamic people & institutions focused on
developing a sovereign & sustainable planetary society

matching civil-society, government, breakthrough technological solutions &
sustainable economics to forge a historic mission.....

manifesting a world beyond war, poverty & disease

from unsustainable steel and concrete infrastructures.....to inspired, affordable sustainable living
from densely populated impoverishment to thriving and self-sustaining agrarian communities

The Vision: Sierra Leone as a planetary exemplar

where government and civil society are both the participants and beneficiaries
of a pioneering and historic full-spectrum social-experiment

manifesting a thriving self-sustaining community of 5000 expatriot residents,
international visitors & students focused on placing Sierra Leone as a planetary leader
in robust ecological & health-tourism

an integrated network of newearth resorts, newearth learning faculties, health clinics
& spas, botanical gardens, organic permacultured farms, and residential dwellings -
living and learning alongside the local Sierra Leonian population

empowering Sierra Leone's people - exemplifying Sierra Leone's government

a historic initiative uniting local citizens with 5000 international residents, students & visitors
focused toward promoting dynamic health-tourism and eco-tourism for Sierra Leone

H. E. Ernest Bai Koroma the President of
Sierra Leone & H. E. Victor Bockarie Foh
Vice President of Sierra Leone.

HISTORY IN THE MAKING

linking up a nation-wide network of decentralised, self-powered, self-sustaining communities

Phase One

NewEarth Initiative (Humanitad) to liaise with **Bishop Samuel Ndonema** and draft a proposal / memorandum for the attention of **H. E. Ernest Bai Koroma** the President of Sierra Leone and **H. E. Victor Bockarie Foh** Vice President of Sierra Leone.

NewEarth delegation to visit Sierra Leone in Autumn 2016 to formalise the initiative agreement and meet with all relevant bodies, individuals and agencies.

Establishment of a working committee in Sierra Leone comprising of selected officials, volunteers (and any domestic stakeholders / entrepreneurs wishing to benefit from the commercial elements).

Inspection and contracted procurement of the proposed NewEarth land-holding, facilities and resources extended toward the initiative partnership.

Meeting with the domestic television and national radio agencies to discuss inclusion within the NewEarth Initiative. Setting into pre-production the NewEarth Sierra Leone documentary series: "Building the New Earth in a Lost Paradise".

Meeting with relevant press and media agencies via a press conference.

Phase Two

NewEarth Media to design & develop an immersive NewEarth Sierra Leone web-portal as the catalyst for engaging the public-at-large and generating international marketing & crowd-financing.

Evaluate the available regional and central-governmental concessions.

Generate broad financing from investors as well as local & international stakeholders in: - NewEarth Havens - NewEarth Permaculture Farming - NewEarth Communités - NewEarth Free Zone (Trade & Manufacture) - Humanitad QT-Pi free-energy systems.

Generate broad financing from investors as well as local & international stakeholders in:

- **NewEarth Havens**
- **NewEarth Permaculture Farming**
- **NewEarth Communités**
- **NewEarth Free Zone (Trade & Manufacture)**
- **Humanitad QT-Pi free-energy systems**

Masterplanning and scale modelling. CGI animation envisioning the 3 year, 5 year and 10 year roll-out of NewEarth Sierra Leone.

Establish NewEarth University and begin campaign of awareness both domestically and on the international stage via a television series. Collaborate between NewEarth Media & Sierra Leone national TV network to produce and syndicate the reality show.

Begin the filming, ground-breaking, phase development and manifestation of NewEarth Sierra Leone. Begin the promotion of Sierra Leone as a world-class destination of choice.

Phase Three

Work closely with Sierra Leone government and stakeholders to develop, manufacture and commercialise a broad range of "Made In Sierra Leone" product ranges:

- **Textiles & Fashion**
- **Food & Nutrition**
- **Traditional Arts & Crafts**
- **Sustainable Modular Homes**
- **Breakthrough Technologies**
- **Sustainable Building Materials**
- **Beauty & Medicinal Products**

Work closely with the Sierra Leone government to invite regional leaders into collaborative Summits and Congresses to advance the NewEarth protocols throughout Africa:

- **Technological Breakthrough Solutions**
- **Health & Wellness Innovation**
- **Sustainable Economics**
- **Environmental Remediation**
- **Social & Ecological Welfare**
- **Natural Justice & Rule-of-Law**

Exemplify the people and government of Sierra Leone as a bold, progressive and enlightened self-determining nation, whilst developing a world-class travel & health tourism industry in Sierra Leone.

a historic cooperative approach

I N T R O D U C T I O N

NewEarth offers the most well-researched, clearly defined and deliverable full spectrum socio-economic, socio-political and ecologically-restorative blueprint ever presented.

It is the culmination of two decades of endeavor by its founders working with a planetary network of multi-disciplinary experts in the arts & sciences, political & economic strategy, human-rights and technological innovation.

NewEarth offers an evolutionary platform upon which humanity may collaborate in showcasing a collective vision for a sustainable world free of war, disease and poverty.

The NewEarth Blueprint is a 100% deliverable model which invites conscious, ethical, self-determining people in collaboration with national institutions to establish environments which foster human & planetary well-being and sustainable prosperity.

This model provides a pioneering foundation for human society by re-examining the principles that govern our existence and perceptions and learning from the trials of history.

The New Earth Blueprint offers Sierra Leone a tailored agenda for socio-economic prosperity as well as recognition by the international community, whilst placing; a) the people, and; b) the land, as the core beneficiaries. We greatly welcome working closely with the people of Sierra Leone and their elected government.

media & promotion for Sierra Leone

NewEarth Media proposes to work with Sierra Leone national TV and Radio network, as well as with students of film and media, to develop and then globally syndicate media products for the international and domestic market.

The first media project which NewEarth media intend to produce will be a one hour documentary designed to ignite international interest in the Sierra Leone NewEarth Initiative entitled 'Discovering NewEarth in a Lost Paradise'. It will exemplify Sierra Leones people, culture and traditional heritage as well as spotlight the progressive intentions of it's government and institutions.

Longer term media content will focus on the historic NewEarth Sierra Leone project.....featured as a Reality Television Show.....following the project from conception to fruition over 3+ years.

Furthermore NewEarth Institute welcome the opportunity of working with the Sierra Leone national TV and Radio network to create round-the-clock programing designed to support and accelerate domestic education and knowledge-growth.

Our international fellowship of multi-disciplinary experts in all fields will be invited into Sierra Leone to conduct workshops, symposiums, conferences and field-studies. These events will be filmed, broadcast and archived as a national (and international) repository of knowledge and wisdom for generations to come.

human sovereignty & natural law

Nothing is more essential to the manifestation of a new earth than the recognition of our innate human condition - one of sovereign conscience and free creative expression

To encourage a planetary society of responsible, self-determining human beings, NewEarth has initiated a virtual nation – a fellowship of world citizens founded in recognition of the primacy of human dignity, environmental stewardship and natural law.

NewEarth offers an open invitation to progressive governments of the world, and responsible members of the human family, to transition away from scarcity-based systems introduced by Western imperial interests.

It supports the re-purposing of society toward creative enterprise in a usury-free environment in order to manifest such prosperity, harmony and self-determination.

It is time for progressive governments and members of civil society to come together and enjoin solidarity in reclaiming human dignity and prosperity from the grip of special-interests and the neo-colonialism of modern central banking. Sovereign nations must also be very cautious of the interference of the multilateral institutions and their presumptive control and manipulation.

Sierra Leone is well placed to lead Africa into it's long awaited renaissance and in so-doing enjoy widespread support and acclaim from the enlightened elements within our international community.

dr john walsh
chief-justice
international tribunal for natural justice

conflict resolution & mediation

By supporting one another, loving one another and serving one another, we may finally liberate ourselves from the conflict paradigm in a lasting and meaningful way. All NewEarth initiatives exist to fulfil this purpose.

people-powered justice

Addressing external conflict is nonetheless a fundamental aspect of social/ societal development, and one which must be appropriately addressed. In 2015, at Westminster Hall, NewEarth launched the International Tribunal for Natural Justice, before an international diplomatic gathering, leading international political observers and thousands of people across the globe, for the purpose of realising equal rights and dignity for each member of the human family.

The ITNJ is formatted according to internationally recognised conventions regarding independence of the Judiciary and takes on landmark cases which possess the potential to redress injustices on a global scale.

The ITNJ Committee enables the creation of 'ITNJ Chapters', specific to local territories, whose purpose it is to facilitate the establishment, and support the operation of, Constitutional people's courts. The ITNJ proper avails itself to the settlement of major issues, whilst the delivery of justice in communities is placed back in the hands of responsible, empowered community members.

The ITNJ welcomes any integration with Sierra Leone as the means by which it may effectively deliver on its constitutional responsibility to its people to protect and safeguard their security, peace and welfare.

The ITNJ (International Tribunal for Natural Justice) is able to assist with establishing mediation clinics with local justices throughout Sierra Leone - in order to assist with the decongestion of the Sierra Leone judicial system.

International Tribunal for Natural Justice

new earth

zero point economics

One of the core principles of NewEarth is the recognition that individual members within communities must enjoy the capacity to benefit from a conscious exchange of value between and amongst one another.

Modern central banking and it's usurious practices have brought nothing to Africa other than the systemic destruction of economic and social welfare, whilst fostering the perpetuation of wars and conflicts.

NewEarth is proud to work with some of the worlds leading economists including our Chief-Economist Dr Lawrence Brahm (architect of the Himalayan Consensus and African Consensus). Our economics brain-trust welcomes working closely with the government and national institutions in order to advance a unique economics model tailored to benefit the people and the land of Sierra Leone.

The founding organisation of the NewEarth Project is Humanitad Foundation. Humanitad produced the United Nations Millennium Development Goals Awards at the UN General Assembly Hall and also launched the Exemplar Zero Initiative at the UN promoting full-spectrum sustainability through breakthrough technological innovations and environmental remediation solutions. Humanitad founder Sacha Adams Stone chaired the Global BEM (Breakthrough Energy Movement) Congress in the USA and Europe.

The NewEarth Project benefits from this global network of scientists, innovators and experts, many of whom will be invited to participate directly in the Sierra Leone NewEarth initiative.

dr laurence brahm
newearth chief-economist
architect of 'The African Consensus'

NewEarth bio-architecture and built-environments work in alignment with nature - not against it

environmental remediation

The NewEarth Integrated Biodiversity Conservation Plan facilitates the creation of Community Protectorates where vast areas of the planet can be protected from further degradation.

NewEarth possesses the capacity to deploy a vast array of technologies and international experts to support the bio-remediation of areas adversely affected by pollution and degradation.

NewEarth's founding organisation is the internationally recognised non-profit Humanidad Foundation with an established record within the United Nations IGO community and the international NGO community for fostering and advancing environmental preservation and regeneration technologies and practices.

Water pollution remediation, chemical spillages, toxic waste remediation, even nuclear waste remediation, are all easily addressed once there exists the will and political support of those in positions of influence and power.

Sierra Leone is well positioned to take regional leadership role in this seminal arena of environmental stewardship and remediation.

NewEarth welcomes the opportunity to work closely with the government and institutions of Sierra Leone in this vital arena of planetary concern.

newearth clean water supply

NewEarth water purification and treatment technologies are the leading innovations in this vital sector, representing immediate solutions which are vastly less expensive than any others available on the world market. Water can store health-affirming frequencies as well as disease causing structures, organized and stored in molecular clusters. We can bring its healing energy directly into the body in order to provide greater health.

The purification and structuring of water into its fractal crystalline liquid state is a long known, but rarely used science. Understanding the flow of water and its response to environmental influences is vital in order to treat water in alignment with nature's codes. Restructuring water through vortex technology (centripetal spin), thereby removing trace-toxins is a sure way to ensuring nation-wide health. Fluoride itself is now being recognised globally as being one of the prime causes of cancer in the human body. It is insane that this chemical poison is pumped into the municipal water supply in most cities and put into generic products like toothpaste. Responsible governments (especially in the so-called 'developing world' must desist from promulgating such practices.

Sierra Leone is rich in water. But the challenge is in the distribution of clean and healthy water without any harming negative charge or contamination. Unclean water accounts for a high mortality rate in the country - NewEarth water technology solutions can and will eradicate this.

NewEarth's world-leading desalination and water purification will secure and enable the enhancement of water quality in and around all its operations and will exchange practical knowledge with the local people and institutions of Sierra Leone.

NewEarth Initiative's technology partner **Worldwide Industries Water** are the developers of **the worlds most efficient and cost effective water system**. The W3T can remove over 90% pure drinking water from raw sewage at the same time as sterilizing the waste making it viable for agricultural use. Using our sustainable water system will greatly reduce demand, clean up polluted water sources making them viable human consumption, agriculture, stop the spread of water infections and address many of the environmental stresses associated with human habitation.

dounne alexander, MBE
commissioner
International Tribunal for Natural Justice

gender equality

The NewEarth model takes a fundamentally different approach to the realisation of gender equality.

Gender equality ought to mean that each man and woman has equal access to that which they need to advance their own missions in life, which are all too often gender specific. It is the role of culture to preserve what is noble in a race and not what is ignoble. As it is the role of government to ensure that natural justice and freedoms are married to the people they are mandated to serve.

A man will never give birth to new life, and in recognition of this fact a woman ought to be empowered to make her own choices rather than be forced into masculine sensibilities. This is a foundation stone to natural justice and foundational human-rights. Whilst local cultures must always be respected there is often also an argument for cultures to transcend aspects of their own nature. For example: Western cultures nowadays are necessarily being forced to transcend their old traditions of imperial domination and sequestration of wealth and power.

Women have the right to pursue traditionally masculine pursuits but this does not mean that they ought to be forced to do so. When women and men are equally empowered to pursue their own naturally inspired paths, balance and harmony may at last be restored to suffering family units, which will always be the basis of a prosperous and happy society.

Should Sierra Leone adopt this progressive perspective on gender equality, it would undoubtedly result in its Agenda for Prosperity enabling true equality and harmony amongst its citizenship.

permaculture & agni hotra

The principles and benefits of permaculture are long understood as the most beneficial, low-impact way to produce food.

Properly implemented permaculture strategies significantly increase yields and nutritional value over conventional methods. The amount of energy, labour and water required to produce food by this method is negligible compared to conventional farming.

Q-permaculture is the marriage between this recognized philosophy, time-honoured local practices and a suite of complementary NewEarth technologies and advanced growing modalities.

NewEarth farming technologies subject plants and seeds to processes that induce or enhance fractal implosive energetic fields either prior to planting or during growth, thereby enhancing the life force quotient, nutritional content and quantity of the food produced. Technologies include:

- ❖ biological capacitors for seed storage;
- ❖ the use of vortex technologies, magnetic fields and crystal grids to charge and return solubility to water prior to use for watering plants;
- ❖ geometric patterns created through precise positioning and distribution of plants to provide an enhanced growing environment;
- ❖ the use of rockdust and/or ormus.

The implementation of NewEarth permaculture methodologies in Sierra Leone would provide a strong and lasting foundation for an African agricultural & economic renaissance - to directly ameliorate continental poverty.

SUSTAINABLE BUILDING PRODUCTS

FOOD & NUTRITIONAL PRODUCTS

new building methods & materials...
bio-resonance / hemp & bamboo

NewEarth leads the world in the science of Bio-architecture. This pioneering discipline supports the inclusion of natural fractal (bio-resonant) materials proven to augment our health & wellness.

The science is very simple... a fractal material (usually a material which has been electrically part of some real biology) has an electric field which is phase-conjugating. This means that it creates a field that allows the distribution and compression of the charge to be efficient. This is why biological materials have been shown to enhance seed germination, whereas square buildings loaded with metal and non-fractal materials eventually destroy germinating seeds as well as the human immune systems of those occupying them.

Crops such as hemp should be actively encouraged by every government on earth, as they have the natural capacity to replace prohibitively expensive and toxic (non-bioresonant) building materials such as concrete and steel. ***NewEarth will work closely with Sierra Leone to industrialise such crops and then develop, market and internationally distribute the resultant ‘Made In Sierra Leone’ product lines.***

BELOW: photographs demonstrating the 100%+ growth factor of NewEarth charged seeds versus non-charged seeds

bio-architecture & building natural design

Architecture directly influences one's state of mind and level of awareness. The spaces we inhabit affect our emotions, biology, health, and how we express and interact with one another.

Natural design is the application of design principles to the creation of man-made spaces that honour the natural order, thereby enhancing rather than diminishing one's level of harmony with the natural world. By honouring this natural order throughout its design philosophy, NewEarth supports the manifestation of consciousness-enhancing structures and developments that align with the design of the human form.

Such structures generate a measureable field effect – a neg-entropic implosive electrical field – that reorganises matter back to its natural state. Meaning – buildings that heal their occupants at the cellular level AND make for comfortable, well-appointed living spaces.

All components and infrastructures are integrated into self-sufficient systems designed to complement the surrounding natural environment. These components mimic a natural ecosystem in their own right, yet function as an integral part of the wider local ecosystem.

geomancy

Geomancy literally means, "divining the Earth." It is an art that involves the harmonization of the subtle earth energies that flow throughout the landscape. Many factors influence these energy grids: electricity, magnetism, light, colour, heat, sound, matter and consciousness.

A photograph of a traditional thatched-roof hut, likely a traditional house in a tropical region. The hut has a large, rounded, conical roof made of dried palm fronds or similar natural material. It features several small, triangular openings in the roof, possibly for ventilation. The hut is situated in a lush, green environment with many palm trees and other tropical vegetation in the background. In the foreground, there is a body of water, possibly a pond or a slow-moving stream, which reflects the hut and the surrounding trees. The reflection is very clear, creating a symmetrical effect. To the right of the hut, there are some bamboo poles leaning against it. In the distance, to the right, a person can be seen working in a field. The overall scene is peaceful and idyllic, representing a traditional way of life in a tropical setting.

smaller communities designed on zero-point micro-grids equate to a prosperous society.
decentralisation is proven to be the shortest path to empowering a healthy and creative society.

education & learning

Education forms the backbone of every society. But modern education has clearly failed both the citizenry of the world as well as both our institutions and organs of governance. This is clearly proven by the fact that there is more poverty, disease, environmental degradation, inequality, corruption and violence in our world today than at any time in recorded history. Something is wrong with the picture.

NewEarth Project has divined what is wrong and where the solutions lie in restoring human dignity, planetary sustainability and social empowerment.

Exploring and questioning the basic ideas about education is paramount to human evolution. A new ethic must be allowed to germinate in order to transcend the problems which mire our global society, an ethic which nurtures creativity and allows us to transcend the limits imposed by most existing educational systems.

Offering guidance and inspiring wisdom is key if we are to release our children from the psychological bonds of their forefathers.

Each must learn the fundamental laws of nature to experience the interconnectedness and interdependency of life for themselves.

Through direct experience and connection to life and community (through the encouragement of involvement in community projects which they choose for themselves), children and young adults remain intimately connected with the natural evolution of their communities.

NewEarth Project welcomes working closely with the national TV and radio network and the national learning institutions, bringing leading international multi-disciplinary experts to Sierra Leone in order to exchange wisdom and knowledge-sharing.

newearth university

NewEarth University offers a full-spectrum learning community (online & in physical community environments) purposed toward implementing this new pedagogy.

NewEarth University houses an international fellowship of world-renowned luminaries, visionaries, wisdom-keepers and practitioners from all walks of life - gathering to share their gifts and talents.

NEU has two primary functions:

- 1) to evolve a full-spectrum virtual resource repository as a library of rich content to inform and aid all people of the world (including breakthrough, life-altering energy and technological design innovation blueprints and toolkits assimilated into the mainstream consciousness); and
- 2) to emerge as a global network of on-site community campuses established as learning platforms for the purpose of implementing the NewEarth ethos.

A proposed Sierra Leone NewEarth University will serve to anchor a new paradigm of sustainable community-oriented lifestyle, work and play.

All programs are offered through one of five 'schools', representing each of the five earthly elements:

- Natural Law & Sovereignty (Ether)
- Environment & Economy (Earth)
- Science & Design Innovation (Fire)
- Health & Wellness (Water)
- The Living Arts (Air).

newearth institute director
newearth project international

qt-pi - decentralizing power

an exclusive newearth proprietary technology offering

the most advanced free-energy system on earth

A Humanitad-protected innovator has developed a method of generating electricity using high frequency AC current extracted from a created magnetic field. Prototype units are currently in development and are available for demonstration. Completed power units will be used for two purposes:

- ❖ Standalone generators of 2 kW (48 kWh per day) to 5 kW (96 kWh per day) for home and small business applications.
- ❖ Power applications for electric cars as drive extension to 500 miles or more between charges initially.
- ❖ Power applications for electric boats for extended boating time with no cost of fuel.
- ❖ Power booster applications to increase power output of sources such as wind, solar, etc.

The QT-Pi provides the ultimate 'green energy' solution as the following occurs.

- ❖ No resources outside a starting battery are needed to generate power. Connection to the grid is also available with roughly 3 times the power output as input.

Continuous perpetual output.....with no moving parts.

- ❖ No emissions, no toxic substances, and no harmful EMF's.

harvesting energy

The **QT-Pi** Generator is spinning the generated magnetic field to create high frequency alternating current. This energy harvesting can be proven in third party results from the utility company and can be demonstrated and measured now with conventional voltage and amp meters.

how does it work?

The electron as a spherical vortex has an electric tension voltage of 511 kW (**effective value**) between its surface and its centre. We appear to be moving electron fields through the **QT-Pi**, increasing their angular velocity towards the centre.

The electrons, which started as spherical elementary vortices, are pulled apart to vortex rings like planar discs. This concentration of energy to the centre of the disc works like a black hole in space. The increased spin can be measured by the use of a magnet measuring the increased vibration rate at the centre of the vortex compared to the outside edge of the vortex.

Sierra Leone is invited to be the world's first sovereign nation to benefit from this paradigm-shifting technology.....offering it a historic opportunity to claim economic and social prosperity and self-determination.

newearth's qt-pi - products

QT-Pi Box

QT-Pi will begin operations in the B2B sector targeting those sectors with high energy consumption. We seek to build a significant number of customers in the first 6-18 month from operational start. These business services will be based on an exclusive lease model of the **QT-Pi** (5 / 10 / 25 / 50 KW). The **QT-Pi Box** product will have a robust design and come with full service and maintenance.

QT-Pi Egg

This B2B roll-out model will be accompanied by our **QT-Pi** consumer products about 12-18 month after operational start. We expect to be offering 2 different consumer products:

- **QT-Pi Egg2** (2KW)
- **QT-Pi Egg5** (5KW).

Both will be housed within an egg-shaped colour-changing led lamp with remote control to manage colour settings (changing, stable, etc...). For future models we plan to add additional features, ie: a loading doc for mobile phones, computers, etc, a storage module including display (for music player) and outlets for speakers.

The opportunity is at hand for Sierra Leone to become the first African nation to obtain full energy independence AND adopt this potentially infinite energy production capacity as the basis for a new sovereign national reserve currency, thereby ending indebtedness to the BIS, World Bank and other external organs which currently control it's economic destiny..

Energy independence will ensure that Sierra-Leone takes the lead in the so-called 'developing' world delivering it's people into abundance and out of Western colonial hegemony and debt-enslavement.

newearth innovators and design partners intend to position sierra leone at the vanguard of sustainable planetary visionneering....on land, in the air and upon the sea

newearth sierra leone can serve to demonstrate how a zero-point social experiment can become the signature of a prosperous and abundant future for all of humanity

eco-tourism & health tourism

NewEarth is becoming a popular planetary movement hub for conscious seekers who are searching for 'something more' out of life. NewEarth Havens aim to fulfil that need by marketing themselves as responsible, eco, conscious and sustainable tourism experiences that promotes community life. Our flagship NewEarth Haven opens in June 2016 in Bali, Indonesia.

This vast emergent sector of conscious eco-tourism is estimated at roughly 75% of travellers polled, all of whom want a "more responsible holiday experience" and are ready to explore concepts beyond the landscape of simple sustainability ideas.

NewEarth can position and promote the Sierra Leone travel experience as a world-class venue for health tourism. Spas & wellness clinics can twin with treatment centres around the nation for cancer and malaria (two of the biggest killers) amongst other ailments. ***Humanidad has a global network of doctors, medical innovators and treatments successfully treating illnesses which modern allopathic medicine fail to cure.*** Big-Pharmaceutical vested interests work hand-in-hand with the multilateral political institutions to crush medical innovation where it conflicts with vested interests, to the detriment of all people of the world.

NewEarth Sierra Leone can therefore take centrestage in the pioneering enterprise of breakthrough medical innovation and treatment and benefit directly from the commercial exploitation of such breakthrough innovations.

from unsustainable steel and concrete infrastructure to cheap, affordable sustainable living

from havens to communities....

NewEarth Havens are bio-architected retreat developments which are back dropped against idyllic natural environs, serving as stepping-stones toward full fledged self-sustaining agrarian NewEarth communities.

They place strong emphasis on aesthetic beauty, cultural infusion and health & well-being along with conscious commercial exchange and the engendering of creative-community spirit.

NewEarth Havens extend an opportunity to land owners throughout the world to create their own Haven project, offering a unique, eco-friendly, sustainable and adventurous travel & tourism experience which directly benefit the local community and host-nation.

NewEarth Havens offer a physical platform for ideas to spread, innovations to incubate and flourish, and for advancements in science and consciousness to breakthrough into the mainstream.

New Earth Haven serves as a prototype-bridge offering everything from a glimpse, to a deep plunge into a new way of life.

It offers a perfect opportunity for incremental participation by Westerners (expatriots) wishing to relocate part-of-the-year or permanently into a more affordable, simplistic and life-affirming community environ...within a NewEarth Community.

The cost-of-living index combined with favourable weather conditions offers a laid-back lifestyle in Sierra Leone inviting thousands of expatriots to invest their lives, their creative energy and financial investments into a 'life worth living' out of the rat-race and yet only a short flight from most European cities.

a historic initiative which will ensure that the people and land of Sierra Leone remain as the beneficiaries
